(SPEECH)

[00:00:00.54] Hello again. I'm Seth Clifford, Vice President of Global Engineering at BISSELL. We at BISSELL are very excited about our new cordless Crosswave. We wanted to make sure that our cordless version of the Crosswave delivered both excellent runtime and excellent cleaning.

[00:00:18.42] The battery is designed to deliver up to 30 minutes of cordless cleaning, with maximum suction power. It pools all the dirty water and debris into a separate dirty water tank. This keeps your floors clean, and minimizes dry time.

[00:00:34.26] And when you're done, put it on the 3-in-1 docking station. It will automatically recharge so you're ready for next time. Being cordless is just one more way the BISSELL Crosswave Cordless Max saves you time.
